

RIGID FASTENING

There is not a bolt, nut, washer or spike too big or too small for us to manufacture or supply to the permanent way industry. Rigid fastenings such as coach screws are used to tighten the baseplates on sleeper turnout sets.

Pandrol SA (Pty) can supply a wide range of rigid fastenings including, but not limited to, the following:

- Rail dog spikes
- Coach screws
- FISH plates
- Nuts
- Washers
- Square head round neck bolts
- Cup oval and cup square neck bolts
- T-Head bolts square and round neck
- Bridge or hook bolts
- Rail heel no. 1-5
- J bolts
- L bolts
- Baseplates
- Insulated block joints

SQUARE HEAD BOLTS

These bolts can be manufactured to SABS mild steel grade 6.6 or SABS high tensile steel grade 8.8 as well we the latest Transnet specifications. Metric and imperial sizes are available. The square head bolts, with either oval or square necks, are used to tighten the FISH Plates with the heavy series nut.

Permanent way fastenings include FISH plate bolts, heel and crossing bolts and track related to the mining industry.

- Range = M20, M22, M24, M27, M30
- Length = 50mm – 650mm (long)
- Any nut, double coil or single coil spring washer as order states
